

EMERGENCY NUTRITION INTERVENTION FOR CHILDREN UNDER FIVE, ADOLESCENTS, PREGNANT & LACTATING WOMEN (ENICAPLW)

June - 2019

SARPV is working in Rohingya camps with an objective to provide nutritional support to children with severe acute malnutrition, adolescents, pregnant and lactating women. SARPV is always trying to achieve 100% nutritional coverage with the best possible effort. Eid-ul-Fitr is considered the largest religious festival in Bangladesh which was observed during the first week of June. People observed the first ten days of June as Eid vacation. Before the Eid vacation has begun, SARPV provided double amount of RUTF to the beneficiaries, so that there won't be any shortage of RUTF during Eid vacation. In addition an emergency nutrition team was formed to avoid any kinds of difficulties in OTP during this tenure.

Achievements

The monsoon season was started on 15th June. There was not so much heavy rainfall throughout the month but it was drizzling most of the times. According to the ISCG, in June there were approximately 130 weather-related incidents including wind storms and landslides which affected the camps. SARPV had done emergency planning to prevent any circumstances. During this reporting period, 22376 children aged under five years and 5608 children aged over five years were screened for SAM (Severe Acute Malnutrition) among which male and female ratio was 44.8 and 55.2 who were referred to SARPV SAM treatment centers (OTP) for treatment. Two of them were identified as SAM with medical complications and referred to Stabilization Centers (SC) for in-patient care. In June, 337 under-five and 48 over five SAM affected children were cured. Moreover, 854 children were also identified who were suffering from Moderate Acute Malnutrition (MAM) and among them 363 identified MAM patients were referred to TSFP for treatment and 6 SAM affected children were transferred in from TSFP. During this period, the defaulter rate was 1%.

Indicators	Monthly Target	UCP 1	UCP 2	KTP 1	KTP 2	KTP 3	KTP 4	KTP 5	KTP 6	Total	Variance
Number of U5 children screened at community level	24760	2083	2261	4238	3158	3360	2869	1637	2770	22376	2384
Number of children over 5 screened monthly for malnutrition by MUAC measurement and edema check	-	573	605	505	676	1626	1076	547	0	5608	5608
Number of U5 children re-screened at community level	-	139	116	0	0	0	0	5	399	654	654
Number of children admitted for SAM treatment	417	50	79	77	42	94	81	66	82	571	-154*
Number of children over 5 with SAM newly admitted for treatment	-	30	7	10	18	40	13	60	0	178	178
Number of children over 5 with SAM Children Cured	-	0	2	11	3	28	4	0	0	48	48
Number of 6-23 month children reached with Micronutrient Powder (MNP) supplementation	167	7	20	4	0	8	30	6	39	114	53
Number of Boys and Girls aged 0-59 months identified with SAM with complication referred from OTP to Stabilization Centers(SCs)	8	0	0	1	0	1	0	0	0	2	6
Number of Pregnant and Lactating Women (PLW) reached with counseling on IYCF-E in Emergency practices	80	10	30	10	34	25	16	6	41	172	-92*
Number of Pregnant Lactating	417	53	103	80	185	139	193	84	76	913	-496*

Women (PLW) reached with IYCF-E messages in OTP
